Ref: Comments on 200 West Area Carbon Tetrachloride Plume
EE/EA DOE-RL 91-32 Draft B

Questions:

By what authority did you create an artificially derived
limit for CCl4 concentrations in the environ?

Isn't CCl4 the solvent that we used in Recuplex?

Isn't CCl4 the fire extinguishing agent my father used in the
tear-shaped glass containers in his cow barn?

Wasn't CCl4 the fire extinguishing agent required by the
U.S.Coast Guard 30 years ago?

Why have you outlawed the use of CCl4?

Do you fellows need some CCl4 to test your recovery system?

I have a 55 gallon drum of it that I will donate. All that I
want in way of compensation is a detailed report on the
efficiency of recovery. I will "spill" a drum which weighs
840 pounds net. How much will your very expensive equipment
recover? Can we get together for a test?
